Виктор Николаевич Баграташвили

(01.03.1947 – 12.04.2018)

Ушел из жизни доктор физико-математических наук, профессор, заслуженный деятель науки РФ, заведующий Отделом атомно-молекулярных технологий Института фотонных технологий им. В.С. Летохова ФНИЦ «Кристаллография фотоника» РАН Виктор Николаевич Баграташвили.

Вся научная жизнь Виктора Баграташвили была связана с Троицком: после окончания МФТИ - аспирантура в ИСАНе у В.С. Летохова, а затем работа на руководящих позициях в НИЦТЛ АН (в дальнейшем переименованном в ИПЛИТ РАН, ИФТ РАН). В 2015 году он стал в Троицке Человеком года.

Виктор Николаевич Баграташвили талантливейший ученый с широким кругом научных интересов, обладавший энциклопедическими знаниями, колоссальной работоспособностью и неподдельным интересом к окружающему миру. Трудно перечислить все области его научной деятельности. Это и лазерная спектроскопия колебательно-возбужденных молекул и лазерное разделение изотопов, ИК-лазерная фотохимия многоатомных молекул, лазерные микротехнологии и напыление тонких пленок, спектроскопия и фотохимия дефектов в прозрачных диэлектриках, биофотоника и лазерная медицина, биоматериалы и тканевая инженерия, химическая физика и диагностика сверхкритических сред, нанотехнологии.

Виктор Баграташвили был Организатором науки с большой буквы. Огромное количество научных партнеров и коллег из разных городов России и зарубежья, совместные проекты и публикации, организация научных мероприятий, экспертная и редакторская деятельность, финансовое благополучие его родного научного коллектива, несомненно, подтверждают это. Виктор Николаевич обладал удивительным даром находить друзей и единомышленников, увлекать их своими идеями, которых у него всегда было великое множество. Друзья и коллеги Виктора Баграташвили издали в его память книгу воспоминаний.
