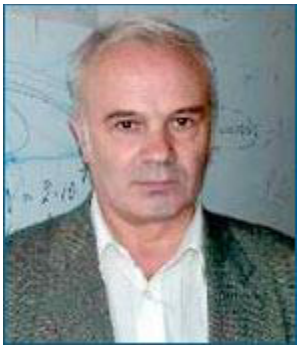
Евгений Васильевич Суворов



(1943 - 2019)

Евгений Васильевич окончил радиофизический факультет Горьковского госуниверситета им. Н.И. Лобачевского в 1965 г. по специальности «Радиофизика»; а затем аспирантуру кафедры распространения радиоволн при этом факультете. В 1973 г. защитил кандидатскую диссертацию «Некоторые вопросы теории генерации и распространения электромагнитных волн в релятивистской плазме», в 1993 г. - докторскую диссертацию «Электронный циклотронный резонанс в термоядерной плазме». В 1969-1977 гг. Евгений Васильевич работал в Научно-исследовательском радиофизическом институте (НИРФИ), а затем в образованном из нескольких отделов НИРФИ Институте прикладной физики РАН. В ИПФ он заведовал отделом, был заместителем директора по науке и руководителем самого крупного в ИПФ отделения физики плазмы и электроники больших мощностей.

Научные интересы Евгения Васильевича касались генерации и распространения электромагнитных волн в плазме, взаимодействия мощного излучения с плазмой, управляемого термоядерного синтеза, микроволновой диагностики термоядерной плазмы, обратных задачи мониторинга окружающей среды с помощью микроволнового излучения. Он был также профессором факультета «Высшая школа общей и прикладной физики» ННГУ (до 1991 - физико-технический факультет Горьковского политехнического института) и организатором Всероссийских семинаров по радиофизике миллиметровых и субмиллиметровых волн.
