

# Владимир Геннадьевич Калинников

(28.10.1939 - 09.02.2017)

9 февраля 2017 г. скоропостижно скончался известный ученый, главный научный сотрудник Лаборатории ядерных проблем ОИЯИ, доктор физико-математических наук, профессор Владимир Геннадьевич Калинников.

Научная деятельность В.Г. Калинникова была неразрывно связана с ОИЯИ. Поступив на работу в 1961 году после окончания физического факультета Ленинградского госуниверситета, Владимир Геннадьевич сразу же включился в программу исследований свойств нейтронодефицитных изотопов, получаемых в реакции глубокого расщепления протонами на синхроциклотроне ОИЯИ. При его активном участии это направление впоследствии развилось в комплексную программу исследований ядер, удаленных от линии бета-стабильности, на установках ЯСНАПП (ОИАИ) и ИРИС (ПИЯФ РАН).

Под руководством Владимира Геннадьевич был выполнен ряд приоритетных исследований, в которых установлены важные факты для физики бета-процессов и атомного ядра: проведено систематическое изучение альфа-распада короткоживущих изотопов редкоземельной области, идентифицировано большое количество ранее не известных изотопов и изомеров, впервые экспериментально определен протяженный участок границы устойчивости ядер по отношению к радиоактивному протонному распаду, исследованы фундаментальные характеристики ядер вблизи этой границы.

На комплексе ЯСНАПП-2 под руководством Владимира Геннадьевича были получены важные методические и физические результаты: обнаружено несколько новых изомеров, проведены систематические исследования  $\alpha$ -эмиттеров редкоземельной области, в измерениях  $\alpha$ - и  $\beta$ -переходов ядер, связанных "цепочкой" последовательных превращений, установлены массы 25 ядер от Рг до Тм,

обнаружены низкоэнергетические E1-переходы в распадах четных изотопов эрбия, в значительной степени снимающие вопрос об аномально быстрых запрещенных бета-переходах.

В.Г. Калинниковым опубликовано свыше 200 научных работ, он соавтор 3 монографий и 2 обзоров. Под его руководством 14 физиков из разных стран-участниц ОИЯИ защитили кандидатские диссертации, некоторые из них позднее стали докторами наук.

Владимир Геннадьевич всегда находился в центре общественной жизни Института и уделял большое внимание научно-организационной работе. Многие годы он был членом ученого и научно-координационных советов ОИЯИ по физике низких энергий. Он являлся постоянным членом организационного комитета международных совещаний по ядерной физике.

Научные достижения Владимира Геннадьевича отмечены 7 премиями ОИЯИ, премией ПИЯФ (Гатчина) и медалями Венгерского физического общества, Университета Марии Кюри в Люблине. Ему были присвоены звания "Почетный сотрудник ОИЯИ" и "Почетный работник науки Монголии".

В наших сердцах навсегда сохранится светлая память о Владимире Геннадьевиче - замечательном человеке и ученом.

FORMATION OF CLOSE-TO-TARGET PRODUCTS IN REACTIONS INDUCED BY C-12 IONS ON TIN ISOTOPES AT THE ENERGY OF 2.2 GEV PER NUCLEON  
PHYSICS OF ATOMIC NUCLEI 75(2), 136-142 (2012)
- 112.** HOVHANNISYAN, GH; DANAGULYAN, AS; BALABEKYAN, AR; ADAM, J; KALINNIKOV, VG; PRONSKIKH, VS; SOLNYSHKIN, AA; TSOUJKO-SITNIKOV, VM; VLADIMIROVA, NM.  
INTERACTION OF C-12 IONS WITH NUCLEI OF ENRICHED TIN ISOTOPES AT AN ENERGY OF 2.2 GEV PER NUCLEON  
PHYSICS OF ATOMIC NUCLEI 75(2), 125-135 (2012)
- 113.** IZOSIMOV, IN; KALINNIKOV, VG; SOLNYSHKIN, AA.  
RESONANCE STRUCTURE OF STRENGTH FUNCTIONS FOR FIRST-FORBIDDEN BETA (+)/EC TRANSITIONS  
PHYSICS OF ATOMIC NUCLEI 75(11), 1324-1330 (2012)
- 114.** DANAGULYAN, AS; HOVHANNISYAN, GH; BALABEKYAN, AR; DEMEKHINA, NA; KALINNIKOV, VG.  
INVESTIGATION OF ISOMERIC RATIOS IN HIGH-ENERGY REACTIONS  
PHYSICS OF ATOMIC NUCLEI 76(3), 349-354 (2013)
- 115.** ANDREEV, SN; BARMINA, EV; KALINNIKOV, VG; SIMAKIN, AV; SMIRNOV, AA; STEGAILOV, VI; TYUTYUNNIKOV, SI; SHAFEEV, GA; SCHERBAKOV, IA.  
OBSERVATION OF LASER-LIGHT EFFECT ON CS-137 RADIOACTIVITY IN COLLOIDAL GOLD: FIRST RESULTS  
PHYSICS OF PARTICLES AND NUCLEI LETTERS 14(6), 900-903 (2017)
