

Виктор Александрович Соменков

(23 февраля 1937 г. – 01 февраля 2018 г.)

Ушел из жизни российский физик, доктор физико-математических наук, профессор, лауреат Государственной премии СССР 1986 г. **Виктор Александрович Соменков.**

Виктор Александрович Соменков родился 23 февраля 1937 года.

Окончил физико-химический факультет МИСиС.

Научная сфера - физика твёрдого тела.

С 1960 г. работал в ИАЭ имени И. В. Курчатова (Российский научный центр «Курчатовский институт») и его Институте сверхпроводимости и физики твердого тела: научный сотрудник, начальник лаборатории, начальник отдела нейтронных исследований конденсированных сред, последняя должность — ведущий научный сотрудник.

Доктор физико-математических наук (1980), профессор (1985).

Докторская диссертация:

Структура и фазовые превращения гидридов переходных металлов: диссертация доктора физико-математических наук : 01.04.07. — Москва, 1979. — 307 с.

Лауреат Государственной премии СССР (1986, в составе коллектива) — за цикл работ «Новые методы исследования твёрдого тела на основе рассеяния нейтронов стационарных ядерных реакторов» (1961—1984).

Лауреат Государственной премии РФ (2000, в составе коллектива) - за разработку и реализацию новых методов структурной нейтронографии по времени пролёта с использованием импульсных и стационарных реакторов.

Заслуженный деятель науки РФ (1998).
