

Казьмин Владимир Григорьевич

(11 ноября 1930 г. – 2010 г.)

Доктор геолого-минералогических наук (1982), член-корреспондент РАЕН (1991).

Родился в 1930 году в Ростове-на-Дону.

В 1953 году окончил Московский Геолого-разведочный институт.

Работал геологом, затем начальником геолого-съёмочной партии в тресте «Аэрогеология». Кандидатскую диссертацию защитил в 1965 году на тему «Тектоника Северо-Восточного Средиземноморья и условия образования офиолитовых формаций в Северо-Западной Сирии и сопредельных территориях» по материалам, собранным в сирийской экспедиции. С 1966 по 1981 гг. работал старшим научным сотрудником НИИ геологии зарубежных стран, из них 10 лет работал экспертом-геологом ООН в геологической службе Эфиопии. Докторскую диссертацию на тему «Развитие континентальных рифтов», по результатам многолетних исследований восточно-африканских рифтов защитил в 1982 г.

С 1981 г. работал в Институте океанологии им. П.П. Ширшова РАН, вначале старшим, затем ведущим научным сотрудником. С 1987 г. заведовал Лабораторией геоморфологии и тектоники дна океана. Занимался проблемами палеоокеанологии, плито-тектоническими реконструкциями. Участвовал в морских экспедициях, а также в палеоокеанологических экспедициях на Урале и Кавказе, в экспедициях по изучению Байкальского рифта.

С 2002 г. работал главным научным сотрудником Лаборатории сейсмологии и геодинамики.
